

Testimonials for PRN Physician Recommended Nutraceuticals®

I will begin thanking you for changing my life. I began taking your Flex Benefits System 3 months ago and the results have been nothing short of extraordinary. Before I started taking your products, I was taking 40mg of Nexium for a stomach ulcer. My doctor was suggesting I consider taking a statin for my rising cholesterol. As of Today, the aches and pains that I suffered from are completely gone. I just saw my doctor yesterday and he was so impressed that he said I could stop my prescription medications and avoid taking a statin. I have every single member of my family and friends are on your products. Thank You!

Helmut, Pipersville, PA

Dr. Gross:

I'm a cardiac nurse who hasn't been able to work since Dec 10, 2008. I have fought SLE/lupus until I couldn't hide my severe fatigue and inability to think clearly. My dry eyes also has been a problem. No clear diagnosis of Sjogrens, but I have developed very dry eyes. Restasis was prescribed bid.

My ophthalmologist recommended this product. I said, but I'm taking 2,000 units of OTC Omega Fish Oil. He said, try this and see if you can see a difference when you wake up in the morning.

I have stopped the Restasis and only take 2 of the Dry Eye Omega Benefits. I am one of those skeptical hospital nurses. But, this works.

Karen

Thank you for the sample of Flex Omega Benefits. I felt better and had more energy almost immediately after starting this supplement. I really noticed improvement with memory, remembering, overall energy, and well-being. My mood is also brighter. The supplement is easy to swallow and there is no bitter aftertaste. I'll never stop taking my Flex-this supplement has made a huge difference in how I feel. Thank you for a great product.

JoAnn, LPN

I just wanted to compliment you on your excellent customer service...and great product.

I work in an industry where good customer service is essential and kudos are rare. So I wanted to let you know I appreciated the extra bottle and the explanation letter.

Since taking the Omega vitamins, my dry eyes have improved so much,I have recommended this product to many friends.

Keep up the good work!

Diane

I would like to share some important information with you, as you probably already know, and along with your patients, clients and users of your products. I would kindly ask that you post this email in a conspicuous place on your web site, as this letter was totally unsolicited and done in full by my own volition.

I am a 59 year old male, who in the past months underwent corrective surgery for my cataracts. My Primary goal has always been Quality of Vision first and foremost with any potential cosmetic benefit un-weighted, but if it happens would be a plus.

I have a laborious background in Medicine, as I am a former Life Flight Respiratory Therapist, my specialty was NICU, Premature Infants. Within the realm Of Medicine, it is always critical for patients to seek out information about procedures, techniques, the latest and greatest, and to be well informed and deal with people who just don't speak, "We have your best interest at Heart", but that they actually conduct themselves with your best interest at heart. Action always speaks louder than words, in the case of your Company Adam and your product, we clearly have a unique combination of both Spoken and Delivered action, with my best interest. Beyond words, I cannot express my gratitude to you.

Several months after having the procedures done, I developed UOI "Unwanted Optical Images" much attributed to a Dry Eye Syndrome triggered by the surgeries. I was getting "Starbursts and flares with bothersome Haloes as well at night.

As you know, somehow or another I found you and your marvelous Omega 3 product – of which I have had the good fortune to receive its benefit, The Dry Eyes are much better than what they were. Relief was almost immediate, a week maybe and things started to feel better.. my vision improved as well.

The most important part of this letter that I want to share is as follows.I contacted by email and telephone 4 Primary Supplement Companies that provide Omega 3 supplements similar to yours. I believe it is some 6 weeks since I did a very intense investigation search for information on Omega 3 used for Dry Eyes and Post Cataract Surgery. To this day, your company Adam, and your personal Genius, were the only ones responding to me, not only by email,but with prompt and courteous return phone calls. Information Galore, and you folks deliver impeccable service and quality of Product.

To this date, I have not received a email, or return call from any of the other companies I contacted. It would seem to me that they are more interested in "Dollars" than sense.

I cannot stress the significance and importance that a little knowledge goes a long way, and especially today, in the Consumer Market Place, one must exercise the utmost caution and know what they are putting into their mouth and swallowing. Good Information usually leads to Good Choices by all of us.

I am very excited to say, that no my imagination is not running wild, I have derived real and great benefit from your Omega 3 product, I have had a remarkable "turnaround" with my Dry Eyes Syndrome. I also clearly have no intention of using a product like this unless it has your Companies Name on it!

Thank you so very much!
